PROFESSIONAL SUMMARY

Junior Data Scientist, Python Developer, and Data Analyst with strong foundations in Python, SQL, data analysis, and backend development. Experienced in transforming business problems into data-driven solutions through data cleaning, reporting, automation, and cloud-based applications. Built inventory management systems, POS platforms, and business automation tools while working with structured datasets. Practical cybersecurity and logistics security experience brings a strong analytical mindset to operational challenges. Passionate about machine learning and data-driven decision making.

TECHNICAL SKILLS

Programming:	Python, SQL, JavaScript, HTML/CSS
Data Science:	Pandas, NumPy, Data Cleaning, EDA (Exploratory Data Analysis), Data Visualization, Statistics, Scikit-learn (Learning)
Databases:	PostgreSQL (Supabase), MySQL
Tools & Frameworks:	Git, GitHub, Linux, VS Code, FastAPI, Flask, Render, Vercel
Cybersecurity:	Wireshark, Nmap, Security Monitoring, Network Analysis

PROFESSIONAL EXPERIENCE

Python Systems Developer *Sep 2025 – Dec 2025*

East Africa Packaging — Nairobi, Kenya

- Designed and developed a multi-user cloud POS system to modernize workflow metrics.
- Automated key inventory management tracks and detailed sales reporting schedules.
- Built custom reporting modules to deliver actionable business insights from structured data.
- Successfully migrated a legacy desktop Tkinter application to a scalable web platform using Flask.

Security Analyst *2025*

Pace Riders Logistics — Nairobi, Kenya

- Monitored high-volume logistics operations for digital security threats and operational risks.
- Investigated operational incidents and compiled formal data reports for management.
- Supported enterprise access control mechanisms and proactive physical/digital security monitoring.
- Identified key trends in security events to systematically optimize logistics security operations.

Freelance Software Developer *2024 – Present*

Independent Practice

- Built tailored business automation systems, inventory management solutions, POS applications, and professional corporate websites (including the Danny Consultancy platform and Makena Herbs solutions).
- Collaborated actively on open-source software development frameworks through GitHub and the CODE254 initiative.

PROJECTS

Cloud POS Analytics Platform

Built a robust cloud-based Point of Sale solution integrated with real-time inventory tracking, automated sales reporting models, and centralized secure database layers.

Garage Management System

Developing an end-to-end web-based platform for automotive vehicle tracking, service scheduling, and data reporting utilizing FastAPI and PostgreSQL.

EDUCATION

Zetech University *In Progress*

Diploma in Computer Science (Currently pursuing BSc in Computer Science part-time)

Jomo Kenyatta University of Agriculture and Technology (JKUAT) *Jan 2024 – Mar 2024*

Python & Programming Bootcamp Certificate

MEMBERSHIPS & CERTIFICATIONS

- Google Developer Group (GDG) Nairobi — Active Member
- Python Programming Bootcamp Certificate — JKUAT
- Network Security Auditing Credentials (Hands-on execution using Wireshark & Nmap)
